The University and the Public Good: What Should We Be Doing on Climate Change?

Naomi Oreskes

Professor of the History of Science, and Affiliated Professor of Earth and Planetary Sciences, Harvard University

Naomi Oreskes is Professor of the History of Science and Affiliated Professor of Earth and Planetary Sciences at Harvard University. She came to Harvard after spending 15 years as Professor of History and Science Studies at the University of California, San Diego, and Adjunct Professor of Geosciences at the university's Scripps Institution of Oceanography. In her research, Oreskes focuses on the earth and environmental sciences, with a particular interest in understanding scientific consensus

and dissent. For the past decade, she has been interested primarily in the problem of anthropogenic climate change. This focus can be most clearly seen in her most recent book *Merchants of Doubt* (2010), co-authored by Erik Conway. Addressing climate change and other examples, this book has focused the attention of the public and the scientific community on the potential for small groups of scientists to drive uncertainty in public perception despite the existence of scientific consensus.

Lecture:

3 to 4:30 p.m.

Multi-Purpose Room

Student Community Center

Reception to Follow:

4:30 to 5:30 p.m.

Multi-Purpose Room

Student Community Center

Sponsored by: The Office of the Provost and Executive Vice Chancellor, John Muir Institute of the Environment, Center for Science and Technology Studies, Coastal Marine Sciences Institute, CCWAS IGERT, REACH IGERT, Southwest Climate Science Center, UC Davis Energy Efficiency Center, California Environmental Law and Policy, the Community and Regional Development Program, the Center for Poverty Research, and the Center for Regional Change
